PROGRAM

The “KEEP IT COVERED!” tarp program is a Clean Communities Program administered by the Salem County Improvement Authority/Solid Waste Division.

The “KEEP IT COVERED!” tarp program, in conjunction with the Solid Waste Facility’s Convenience Center, assists Salem County residents in eliminating windblown litter along our county roadways when transporting their bulk waste for disposal.

Residents will be able to deliver materials that accumulate from cleaning out the garage, attic or a do-it-yourself project around the home to the Convenience Center, for a minimal fee. The Convenience Center will be open for service to all Salem County residents with a valid drivers license listing an in-county address. Must off-load by hand.

Residents can transport their own bulk materials, but the load must be TARPED. This is in accordance with the New Jersey Solid Waste Management Act and the New Jersey Code of Criminal Justice that requires all open vehicles traveling with solid waste to be tarped in order to avoid spillage onto the roadways.

Tarps, size 8’ x 10’, have been purchased with Clean Communities Grant monies and are available at the convenience center, free of charge, to be used for the purpose of covering their load of waste.

Tarps are available through each municipality or SCIA to assist residents in minimizing windblown litter within their municipalities also. Contact the township clerk for information.

IT’S THE LAW!

All residents MUST comply with the law by covering their load with a tarp when delivering their bulk waste materials.

Under the NJAC 7:26-3.4 paragraphs (e) and (i), the law states:

(e) No solid waste vehicle used for transportation, shall be used beyond its design capabilities or in such a manner that littering, leakage, spillage or emissions therefrom of solid wastes will occur.

(i) Tarpaulins or covers shall be provided and used as needed while transporting solid wastes.

Failure to use a tarp while driving to the Convenience Center can result in a fine of \$2,000. Likewise, if your vehicle is overloaded and causes littering, leaking or spilling, you will be subject to a \$2,000 fine.

KEEP IT COVERED!

PROHIBITED WASTE

ASBESTOS

Asbestos material is classified as a hazardous material and must be transported by a licensed hauler according to recommended procedure.

HOUSEHOLD HAZARDOUS WASTE

Hazardous wastes in the home usually come from ordinary products such as oil-based paints, automotive products, cleaning fluids, solvents and garden care products. These products cannot be disposed of with your regular trash through the Convenience Center.

The Salem County Improvement Authority offers a FREE drop-off program for household hazardous waste three times a year on the third Saturdays in April, June, and October, 8 am to 12 noon.

USED MOTOR OIL

Used motor oil can be recycled at your local municipal drop off location. If your municipality does not have a drop off location, please call your local Township Clerk, Municipal Recycling Coordinator or the County Recycling Coordinator for the nearest location. You can also deliver during our Household Hazardous Collection Events.

RECYCLABLES

The following recyclables can be recycled by your township:

Glass (all colors)

Plastic bottles #1's and #2's – No Caps

Aluminum cans

Bi-Metal/Steel cans

Paper

Newspaper

Cardboard

Be sure to rinse out containers. Recycling services are provided by each municipality in conjunction with trash pick up or drop off.
