**DATE:** 1/28/2020  
**TO:** Cordy Taylor, SCIA Board Chairman  
**FROM:** Lodie van Tonder, Landfill Manager  
**RE:** Equipment Repair and Authorization above \$10,000

The final drive on our 2011 CAT D7 Bulldozer needs to be replaced due to the failure of final drive seal on the left side of the dozer which started to show wear late last year. Dave Foster requested the services of Foley CAT to evaluate and repair the damage. Foley CAT determined that, at a minimum, the final drive on the left side will have to be removed and resealed at an estimated cost approximately \$23,000.00.

The undercarriage for this machine also needs to be replaced at an estimated cost of \$70,000.00. The wear of an undercarriage is a standard maintenance item required for any dozer every 2000 to 4000 hours working hours depending on the work environment.

The total cost for both items listed above are expected not to exceed \$92,734.84. SCIA budgeted \$25,000.00 for final drive and \$65,000.00 for the undercarriage in the 2020 SCIA Capital Budget under Equipment Repairs.

This piece of equipment is used for spreading solid waste on the active working face of the landfill to help reduce the daily workload of the landfill compactor and maintaining accessibility on the landfill during wet weather.

This letter is notification, as required in the SCIA Purchase Procedures Policy, that the CAT D7 Dozer will be repaired by Foley CAT, the only certified CAT service center in South Jersey.

If you have any questions regarding the equipment I have specified, please let me know.

**CC:** Julie Acton, SCIA Executive Director
